FDA Commissioner  
Rockville  
Maryland 20852

Sir,

I write to strongly protest the fact that my family and I and all Americans have become guinea pigs for the testing of genetically engineered foods and products.

We would expect FDA regulations to call for mandatory labeling and the requirement of mandatory safety testing of GE foods.

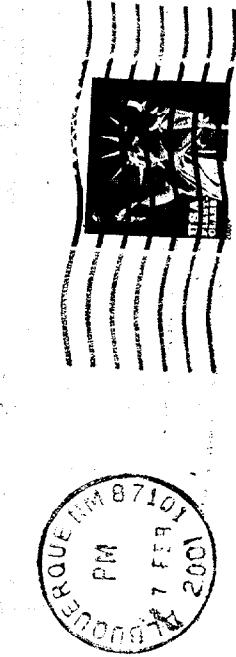

We would call for a moratorium on the planting and sale of all GE food products until rigorous, independent, pre-market safety testing has established beyond a doubt, their safety.

Helen Salvo
